

DIGITAL XRAY

FDR SMART X

FUJIFILM

Make it easy. Make it your own.

Fujifilm's world leading image processing technology, built on a long heritage in medical imaging, and its endless pursuit of improvements in diagnostic imaging.

Its image processing technology automatically recognizes the region of interest and applies the optimum image processing parameters in order to deliver reproducible, high quality images every time. This feature reduces the load on technologists and speeding up diagnosis for Doctors.

High Quality Imaging: An outstanding technology achieves sharper images and more efficient X-ray conversion

Fast Turnaround Time: Speedy display of images greatly shortening examination time. Makes Xray enjoyable and painless experience.

Newest Technology: Automatically adjusts contrast and density for individual body parts
